The TKN! - SMALL medical pouch has two parts: the SHINGLE, which can be removed instantly by pulling up on the BLIP equipped handle, and the outer POUCH which attaches with the Helium Whisper Attachment System. This design allows for high-speed access to the inner contents while ensuring the pouch stays secure on your gear when not being used. Unlike other tactical medical kits on the market, you don't have to choose between speed of access versus security of your medical gear.

The PRO has the components of the ESSENTIALS while also offering a pair of chest seals.
