Designed primarily for First Responders, the PRO version is equipped to bridge the time gap between injury and arrival of advanced medical providers. Paired with a tourniquet, the PRO kit allows for treatment of the most common life threatening traumatic injuries with a minimal amount of training. *Proof of medical authorization required for purchase due to restricted medical contents*

The Medium Trauma Kit NOW!™ (TKN™) replaces a typical Individual First Aid Kit with its unique ability to deploy with one hand. The Medium TKN, built around the Army IFAK, consists of two main components - the outer MOLLE compatible pouch and the removable inner supply chassis. Inside are six rows of various sized heavy duty elastic which holds the Trauma Kit Refill or other medical supplies.

Weight	
Part #	HW-TKN-MED-PRO
