**PRODUCT INFORMATION GUIDE**  
**IWB HOLSTERS WITH UNICLIP & US CLIP**

galcousa.com  
2019 West Quail Avenue Phoenix Arizona 85027

**SAFETY SYMBOL DEFINITIONS**

**DANGER**

Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

**WARNING**

Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

**CAUTION**

Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

**NOTICE**

Used to address practices unrelated to potential personal injury.

Visit GalcoUSA.com/videos to view related safety and product use videos.

**IMPORTANT SAFETY WARNINGS AND INSTRUCTIONS READ PRIOR TO USING GALCO PRODUCTS**

**DANGER**

**Firearms users must understand and obey the Rules of Firearms Safety:**

1. All firearms are always loaded.

2. Never let the muzzle cover anything you’re not willing to destroy.

3. Keep your finger off the trigger until your sights are on target.

4. Be sure of your target and what’s beyond.

**WARNING**

Failure to heed these warnings or follow the operating instructions may result in negligent discharge of a firearm, causing serious injury or death.

Read and understand all owner’s manuals, instructions, and guides prepared by the manufacturer of your firearm prior to use.

Galco holsters are designed to carry specific firearms.

**WARNING**

Before use, be sure the holster selected is designed and intended to carry your particular firearm.

If you have any questions about correct fit, contact Galco Customer Service at 800-874-2526 or customerservice@galcogunleather.com.

You may also visit galcousa.com and use our online “shop by gun” feature.

**WARNING**

Carrying a firearm in an ill-fitting or improper holster can result in serious injury or death. The purchase and use of a Galco holster is at the sole and exclusive risk of the user.

**READ AND UNDERSTAND THIS ENTIRE GUIDE PRIOR TO USING THIS PRODUCT**

Firearms are inherently dangerous. Improper or careless use of a firearm or firearm and holster may result in serious injury or death. It is the user’s responsibility to possess a thorough knowledge of, and be properly trained in, all aspects of firearm use, including holster use and safety.

**WARNING**

Do not place a loaded firearm in a holster without first testing – with a firearm double-checked and verified to be unloaded – for a proper firearm fit.

**CAUTION**

Tension units are not pre-set at the factory. If a holster has tension units, it is the user’s responsibility to ensure they are adjusted to retain the firearm.

Carry the firearm in the safe condition recommended by its manufacturer. This information will be contained in the product information manual provided by the firearm manufacturer. If you do not have the manual applicable to the firearm, contact the firearm’s manufacturer.

Always ensure the firearm is fully seated in the holster, and that it activates all automatic or manual retention devices (when provided). Retention devices must be used when provided.

**WARNING**

If the firearm is not properly secured by means of friction or the retention device(s), it could become dislodged, causing injury and possibly death to the user and others.

**WARNING**

Never holster a firearm in the single-action mode, unless it is a semi-automatic pistol and holster designed and intended for “cocked and locked” or “Condition One” carry.

**WARNING**

Always ensure that a single-action pistol carried in “Condition One” has the manual safety engaged when carrying in a holster.

**WARNING**

Do not attempt to cock a holstered firearm as this may damage the firearm, the holster, or both, and may contribute to a negligent discharge.

**WARNING**

Always protect an exposed magazine release from accidental activation.

**WARNING**

When drawing a firearm from the holster, DO NOT place your finger on the trigger, in the trigger guard, or near the trigger. Position your finger along the frame of the firearm, above the trigger guard. Keep your finger off the trigger until your sights are on target.

**WARNING**

A significant number of negligent discharges - some resulting in injury or death - occur while holstering a firearm. Most are caused by the user’s index finger pressing the trigger. Some are caused because a foreign object becomes entangled or trapped in the trigger guard/holster and presses the trigger. The safest practice is to “look the firearm into the holster.” This should be done methodically and without rushing. While holstering, be fully cognizant that:

1. All safeties are engaged.

2. Your index finger is straight along the firearm’s frame. DO NOT place your finger on the trigger, in the trigger guard, or near the trigger. Keep your finger off the trigger until your sights are on target.

3. No articles of clothing (shirt tails, jacket drawstrings, etc.) become trapped in the trigger guard, holster, or between the firearm and holster.

4. Your shooting-hand thumb is placed over the hammer or the rear of the slide. This will enable you to feel if the hammer starts to move rearward or the slide begins to come out of battery.

5. You strictly observe Rule of Firearms Safety #2: never let the muzzle cover anything you’re not willing to destroy. If you do not know how to holster your firearm without breaking this rule, you should seek training before holstering your firearm while the holster is worn.

6. If for any reason you are unable to “look the firearm into the holster” and not muzzle yourself or others, you should remove the holster from your body, then “look the firearm into the holster” (without breaking Rule #2). After the firearm is securely seated in the holster, attach the holster to your body/clothing in the manner in which it was designed.

7. If you holster your firearm while the holster is off and in your hand, insure you do NOT point the firearm at your support hand. Do not place your support hand (or other body parts) at the bottom of the holster. The holster material is not bullet proof. Neither your support hand, other body parts, nor other people should be muzzled/flagged while holstering.

**WARNING**

A firearm (whether in or out of a holster) may discharge if it falls to the ground or onto another object, causing death or serious injury. Holsters are not designed or intended to prevent firearms from discharging when dropped.

Always place your hand on the firearm and holster when running or performing other physically vigorous activities.

It is the user’s responsibility to maintain the holster by regularly checking component parts for excessive wear and proper function. This includes, but is not limited to, tension units, snap closures and retention devices.

Checking tension units each time the holster is used is required as part of your regular safety inspection. Applying a small amount of clear nail polish to the threads of the tension units, after proper adjustment, will help minimize screw loosening.

**WARNING**

Do not use customized, modified, worn or broken firearms, or those otherwise outside the original manufacturer’s specifications, in a Galco holster. Do not in any way modify, disassemble, or remove any part from this holster, except as approved and recommended in Galco’s Product Information Guide. Do not rely on any holster being “snatch proof” regardless of the number of retention devices it may feature. Rely only on proper training and situational awareness.

**CARRY CONDITION OF THE FIREARM**

**WARNING**

Some single-action revolvers and some semi-automatic pistols must be carried with the hammer or firing pin resting on an empty chamber.

Carrying any firearm with a live cartridge in the chamber immediately in front of the firing pin may cause a negligent discharge. Holsters are NOT designed to prevent firearms discharge if dropped. Information regarding the safe carry condition of your firearm will be contained in the product information manual provided by the firearm’s manufacturer. If you are unsure of the safe carry condition(s) of your firearm, contact the firearm’s manufacturer.

**WARNING**

Galco holsters with retention straps intended for single-action pistols (such as the 1911) are designed for “hammer down, empty chamber” carry, unless otherwise specified. Galco holsters without retention straps (open top) are designed to carry single-action pistols in all safe conditions of carry as specified by the firearm manufacturer.

**IF ANY DOUBT EXISTS AS TO THE SERVICEABILITY OR SAFETY OF A GALCO PRODUCT, IMMEDIATELY CEASE USING IT**

**If you have questions, contact:**  
**Galco Customer Service at 800-874-2526**  
**or customerservice@galcogunleather.com.**

Galco has made every effort to properly label all holsters for the specific firearms they fit. However, firearms manufacturers often make changes to their firearms that affect holster fit.

Galco will not be responsible for such changes, nor for typographical or other human errors that may occur. It is the user’s responsibility to ensure proper holster fit with actual firearms.

It is important to understand that all products, including firearms and holsters, may eventually “wear out” or become unsuitable for the function for which they were designed. Stress and strain placed on a product will vary according to frequency and conditions of use, and therefore it is difficult to indicate a recommended replacement date for this product.

**INSPECTIONS / MAINTENANCE, ADDITIONAL USER RESPONSIBILITIES**

**NOTICE**

It is the user’s responsibility to ensure that the item remains serviceable and safe, and able to continue service within its design intent.

**WARNING**

It is the user’s responsibility to inspect the holster before and after each use for signs of excessive wear or loss of retention capability, and appropriate tightness of all hardware.

**PRODUCT IDENTIFICATION**

Galco products are generally identified with a two-part code stamped into the holster body or label affixed to the item.

An alphabetical or alphanumeric prefix identifies the holster model. For example, the FLETCH model's prefix is FL while the Royal Guard's prefix is RG.

The numerical suffix identifies the particular firearm the holster is intended to fit. For example, the 212 suffix indicates a 5" 1911 while the 224 suffix indicates a Glock 17. The letter "B" or "H" at the end of the code indicates color. B is for black, H for havana brown, while no letter generally indicates tan.

Thus, an FL212 (FL + 212 + no letter) will be a tan FLETCH to fit a 5" 1911, while an RG224B (RG + 224 + B) will be a black Royal Guard for a Glock 17.

Holsters intended for Galco’s modular shoulder systems display letters and numbers that correspond to guns. A Miami Classic holster intended for a SIG P320, for example, will simply read 820. A VHS 3.0 holster intended for a Beretta 92FS will read V3-202.

The numerical suffix of holsters intended for right-hand or ambidextrous use will end in an even number. The suffix of holsters intended for left-hand use will end in an odd number.

You may use the “shop by gun” feature found at our website, galcousa.com, to locate a holster fit. Simply enter the model number on the item (FL224B, for example) in the field. Should you have questions regarding the identification of the firearm intended for your Galco product, you may also contact Galco’s customer service department at 800-874-2526 (during business hours) or by email at customerservice@galcogunleather.com.

**WARNING**

A small number of Galco holsters are approved for use with multiple firearms. Care must always be taken to ensure your holster is an appropriate and approved fit for your firearm. Never carry a firearm in any holster not specifically recommended by Galco for that firearm.

4

THANK YOU FOR YOUR PURCHASE OF  
A GALCO PRODUCT! WE APPRECIATE  
YOUR BUSINESS.

Galco utilizes the UniClip™ and the Ultimate Stealth™ (US) Clip (fitting belts up to 1½” wide or unlimited width respectively) which can be adjusted to carry the holster strong-side, cross-draw, or in front of the hip (appendix carry). Whether your choice is FBI-forward cant, barrel-forward cant, or neutral cant, the clips allow precise adjustment to your preferred angle of carry. A tucked-in shirt will completely conceal your firearm.

TUCK-N-GO 2.0

The Tuck-N-Go™ 2.0 is constructed of Premium Center Cut Steerhide™ and features a metal reinforced mouth which allows a smooth and easy return to holster.

SCOUT 3.0 IWB HOLSTER

The open top Scout™ 3.0 is constructed from full grain rough side out steerhide. The smooth leather interior offers a faster, easier draw and the metal reinforced black leather mouth-band allows for easy holstering.

WALKABOUT 2.0 IWB

The WalkAbout™ holsters are made for semiautomatic pistols and revolvers. The holsters feature an attached ammunition carrier to carry an extra magazine or speedloader. The holsters are constructed from Premium Center Cut Steerhide and feature a metal reinforced mouth to allow a smooth and easy return to the holster.

CARE, MAINTENANCE, AND STORAGE

DO

NOTICE

Full grain leather holsters that come in contact with bodily perspiration, the elements, or become soiled on a regular basis may need to be treated periodically with Galco Leather Lotion to slow the natural breakdown of the leather fibers. Dry the leather naturally, without any type of artificial heat.

Clean synthetic material as needed by hand using a soft bristle brush. If additional cleaning is needed, wash by hand with a mild soap and water. Allow to air dry naturally.

NOTICE

Dirt and grit trapped in your holster may harm your firearm’s finish. To clean your holster, especially after use in dusty conditions, simply wipe out the interior of the holster using a clean, damp cloth.

DON’T

NOTICE

Do not store your firearm in a holster if the holster is damp from perspiration or in otherwise moist condition.

Do not use LocTite® or threadlock. Out-gassing from these adhesive compounds will adversely affect plastic, nylon and rubber holster parts.

Do not put Galco synthetic material products in the washing machine.

Do not submerge or saturate your leather product in water or any other liquid or dry your leather product with heat from a dryer, oven, radiator, direct sunlight, etc.

Do not use products such as Neats Foot or Mink oil, as they will damage the leather. Additionally, do not use Galco Leather Lotion or other leather conditioners on Premium Center Cut Steerhide or synthetic materials.

Do not leave your Galco product on the dashboard of your car in summer, or leave it otherwise exposed to the elements.

DON’T (continued)

NOTICE

The above care and maintenance instructions cannot substitute for your good common sense. Following our recommended care and maintenance tips, along with common sense, will allow you to get the maximum service life from your Galco products.

HOLSTER FIT / BREAK-IN

Galco’s full grain leather holsters are made of the finest materials and are precision molded to specific firearms. It may appear the holster fit is too tight at first, but this is by design. We engineer our holsters to fit tightly knowing the leather fibers will relax to the proper fit with use.

WARNING

UNLOAD YOUR FIREARM

(chamber, magazine, cylinder) before testing holster fit.

If the holster has tension screws: Tension units are not pre-set at the factory. You may need to adjust them in order to holster your handgun the first time. We recommend that you check your tension screw adjustments before each use. There is no reason to completely remove tension units. Do not use LocTite® on tension units. However, a single drop of clear nail polish applied to your tension screw threads may reduce its unwanted loosening.

If the fit is too tight when holstering your firearm the first time don’t force it. If you do force the firearm into the holster, it may be very difficult to remove. Instead, follow these simple steps to break in your new holster using a process called blocking:

- 1 Place the unloaded firearm in a plastic freezer bag, or cover it in 2-3 layers of plastic kitchen wrap. Do not cover the grip.
- 2 Insert the bagged/wrapped firearm slowly into the holster, gently twisting it side-to-side to minimize tearing of the bag/wrap.
- 3 Once the firearm is completely seated in the holster, twist it approximately 1/16” in both directions 6-12 times.
- 4 Allow the bagged/wrapped firearm to sit in the holster for approximately 15 minutes.
- 5 Remove the firearm from the holster and remove the bag/wrap from the firearm.
- 6 Insert the unloaded firearm into the holster, which should now be snug but not loose. If it is still too tight, repeat the above steps until the holster is broken in to your satisfaction.
- 7 If necessary, repeat steps 1-6 with an additional plastic freezer bag or an additional 2-3 layers of plastic freezer wrap.

NOTICE

If your holster has a retention strap:

You may need to stretch the retention strap using your fingers only (no tools, no water, no chemicals etc.), before you get it to snap.

- 1 Place the unloaded firearm in the holster.
- 2 Hold the firearm grip in your strong hand and the retention strap in your support hand.
- 3 Prepare the strap for stretching by grasping the snap and pulling the strap taut (remove the slack).
- 4 Twist the strap 90 degrees back and forth in clockwise and counterclockwise rotation 10-12 times while keeping it taut.
- 5 Firmly push the firearm away from you while pulling on the strap and continue rotating the strap.
- 6 Release the tension for a moment and repeat two or three times.
- 7 Pull the strap over the back of the firearm without releasing tension.
- 8 While maintaining the strong tension, attempt to snap the retention strap closed.
- 9 Repeat step 5 as needed.

HOLSTER FIT / BREAK IN (continued)

Following and repeating the above instructions is the only way to an ideal break-in and long service life with proper fit that will last many years.

It is common for the inside of a leather holster to scratch from a single holstering (called etching). A smooth leather lined holster will be even more subject to this normal occurrence. After this initial etching, the holster will custom fit your firearm.

Some modern pistols have very sharp edges, particularly surrounding the ejection port. This may cause an initial feeling of “dragging” on the draw, but will normally resolve quickly with just a few draw-and-holster repetitions.

Try our Draw-Ez™ applied to the inside of your leather holster to shorten the break-in period and provide a slicker draw. Draw-Ez only treats the interior surface of the leather and will not be absorbed by the leather or harm the finish. Do not use Draw-Ez on Premium Centercut Steerhide.

ULTIMATE STEALTH CLIP / UNICLIP

UniClip

Ultimate Stealth Clip

Galco has included two tuckable clips with your holster. The UniClip™ comes attached to the holster and is designed to go over the belt. For optimal use, ensure that the clips hooks beneath the bottom seam on your trouser waistband in addition to going over your belt. This will add stability and allow the clip to lay flatter. The UniClip fits belts up to 1 ½” wide.

Also included with your holster, the Ultimate Stealth Clip™ fits over the waistband of your trousers and under/ behind your belt. Like the UniClip, the Ultimate Stealth Clip is best hooked over the bottom seam of your trouser waistband. It’s compatible with belts of unlimited width.

ADJUSTING THE TUCKABLE CLIPS

Changing the position of the clip enables the user to fully adjust the cant/angle and carry position/location.

FBI/Forward Cant

Barrel Forward or Crossdraw

Vertical/AIWB/Neutral Cant

ADJUSTING FOR CARRY ANGLE

- A. To change the angle of the holster, remove the screw and move the stabilizing post on the back of either clip to one of the three holes on the clip anchor. Position as desired then insert and tighten the screw.

- B. Change the angle of either clip to personalize the cant of the holster to your preferred style of carry.

- C. With your shirt tail outside, place the holster inside your pants, with the bottom hook on the outside of your pants and under your belt. The bottom hook should catch the bottom seam of your trouser waistband. This will add stability and the clip will lay flatter. Your belt will cover the clip, leaving the top hook over the top of the belt (as seen below).

ADJUSTING FOR CARRY ANGLE  
(continued)

- D. Tuck/fold your shirt tail between the backside of the bottom hook and the body of the holster. To draw the handgun, pull your shirt up with one hand, and draw with your strong hand.

AMBIDEXTROUS USE

Moving the clip to the opposite side of the holster allows the user to adapt the holster for ambidextrous use.

REPAIRS

Great care was taken to select the finest materials available to craft your Galco product. It was designed in accordance with the highest engineering standards and hand made using traditional leather craft practices that have become Galco hallmarks over five decades. In the unlikely event a repair is necessary to an unaltered Galco product, simply contact our Customer Service department at 800-874-2526 or customerservice@galcogunleather.com. We will issue you a Return Authorization (RA) number to print on the outside of your shipping container and provide you with detailed shipping instructions.

TERMS OF SALE

Because we have no control over the use of our products, all Galco products are sold as is and “with all faults”. The entire risk as to the quality and performance of the product is with the buyer. Should the product prove defective following its purchase, the buyer and not the manufacturer, distributor, or retailer assumes the entire risk of all the necessary servicing or repairs. Under no circumstances shall Galco be liable for incidental or consequential damages, such as loss of use of property, commercial loss and loss of earnings or profits. The implied warranties of merchantability and fitness for a particular purpose and all other warranties, expressed or implied, are excluded from this transaction and shall not apply to the product sold. The determination of the fitness or the suitability of any product for a specific use is the responsibility of the buyer. The illustrations shown herein are typical as to the finish and application. Due to uncontrollable variances in color saturation, the actual product may differ slightly from that shown on our web site. Galco reserves the right to make changes in product built and/or sold by them at any time without incurring any obligation to make same or similar changes on products previously manufactured and/or sold by them. All Galco products are made in the U.S.A. and produced according to rigid specifications. Prices and models are subject to change without notice. Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, so the above limitations and exclusions may not apply to you. Galco designs, features, and model names are the exclusive property of Galco International. Any and all persons including, but not limited to, individuals, firms and/or corporations are forbidden from imitating, copying or reproducing them in any way.
