

IMPACT[®] SPORT IN-EAR

HEAR-THROUGH PROTECTION WITH  Bluetooth[®]

HOWARD
LEIGHT 

by Honeywell

FEATURING

- ✓ BLUETOOTH[®] VER 5.0
- ✓ REALISTIC NATURAL HEAR-THROUGH
- ✓ 85dB SOUND COMPRESSION
- ✓ USBC RECHARGABLE BATTERY
- ✓ CABLE INCLUDED

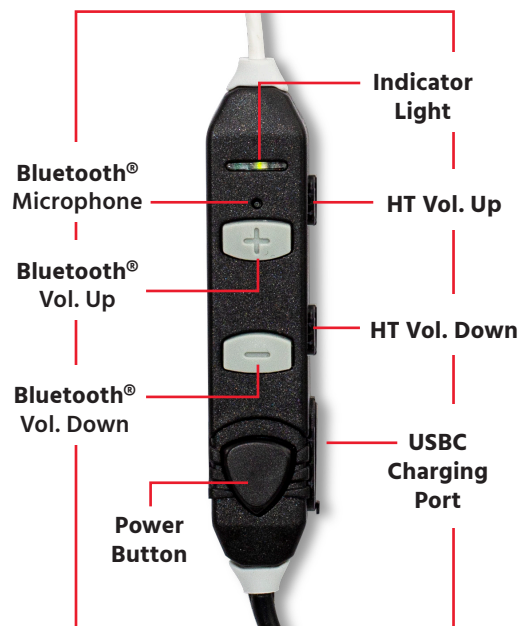

INCLUDES
CARRYING CASE

PRODUCT FEATURES

When the electronic ear plug protection is worn properly, it provides passive protection of 29dB. When switched on, Bluetooth[®] and listening circuit are both turned on, and the device employs built in directional microphones that amplify ambient sounds to a safe 85dB. This allows the ear to hear important commands on the range and crucial environment sounds when hunting for additional protection. It also actively listens and automatically stops amplification when loud impulse sounds like firearms discharges exceed 85 dB. The Bluetooth[®] connection is searchable using your input device.

- Noise Reduction Rating (NRR): 29dB
- Individual and simultaneous Bluetooth[®] VER 5.0
- Independent volume control buttons for Bluetooth[®] and Hear-through
- Realistic, natural hear-through functions with analog circuitry
- 9mm Dynamic range speaker
- 2x Omni-direction in-ear microphones
- Device actively listens and automatically stops amplification when loud impulse sounds like firearms discharges exceed 85dB
- **Run-time of 10 working hours**
- USBC Rechargeable with a charging time of 2 hours
- Unit Battery Type: 200mAh Lithium Battery
- Flexible, moldable earhook
- In-Ear profile allows for full clearance of firearm stock

PRODUCT FEATURES

When the electronic ear plug headphone is switched on, it is set at a safe 85 dB sound level and provides protection from loud external sounds while enhancing natural hearing. This allows the ear to hear important commands on the range, and crucial environment sounds when hunting. Eight different volume increments are provided above safe 85dB initial power on level to optimize hearing in the field by providing up to 6X sound enhancement. In continuous noise environments, the device should be used in passive mode for maximum continuous protection.

- **Noise Reduction Rating (NRR): 29dB**
- Intuitive volume controls
- Realistic, natural hear-through functions with analog circuitry
- 9mm Dynamic range speaker
- 2x Omni-direction in-ear microphones
- Device actively listens and automatically stops amplification when loud impulse sounds like firearms discharges exceed 85dB
- **Run-time of 50 working hours**
- USB-C Rechargeable with a charging time of 2 hours
- Unit Battery Type: 200mAh Lithium Battery
- Flexible, moldable earhook
- In-Ear profile allows for full clearance of firearm stock
