MSRP: \$70.00

SureFire's G2X™ LED illumination tools share many features, such as virtually indestructible high-efficiency LED emitters, 320 lumens of maximum output, precision reflectors, and sleek Nitrolon® polymer bodies. Their differences let you select the ideal light for your needs. Choose single- or dual-output, or a press/twist tactical tailcap switch or press/click switching. Both of these illumination tools are ideal for outdoor use, emergency preparedness, everyday carry, or use by EMTs and other first responders.

The **G2X Tactical** provides a single output level—a brilliant, penetrating 320-lumen beam. It features a lightweight, high-strength Nitrolon® polymer body that's comfortable to hold in cold weather and our classic tactical tailcap switch—press for momentary-on, twist for constant-on.

The **G2X Pro** is a dual-output version that features the same lightweight, ergonomically shaped body. It boasts an identical 320 lumens of max output, but it also features a useful low-output mode that lets you extend the runtime per set of batteries. The G2X Pro comes with a press/click tailcap switch.

FEATURES & BENEFITS

- Virtually indestructible LED emitter regulated to maximize output and runtime
- Brilliant tactical-level max output and, on G2X Pro, useful extended-runtime low output
- Precision reflector creates smooth, optimized beam with plenty of reach and surround light
- Tough, lightweight Nitrolon® polymer body
- Weatherproof O-ring and gasket sealing
- Backed by SureFire's No-Hassle Promise
