

# STRIKE EAGLE®

1-6x24 AND 1-8x24 RIFLESCOPE

## **ELEVATOR PITCH:**

The Strike Eagle® 1-6x24 and 1-8x24 are now faster to run, with an included throw lever and AR-BDC3 reticle. You're on target from point blank, out to 650 yards using the holdovers in the illuminated AR-BDC3 reticle. Plus, with a sleek, clean redesign on the outside, this optic looks better than ever.

## **WHY DID WE MAKE THIS SCOPE?**

Updating the design allowed us to include more shooter-friendly features, like the thread-in throw lever, and it let us place magnification markings on the shooter's side of the magnification ring to make for a faster adjustments. The new illuminated AR-BDC3 reticle focuses the shooter's eye to the target faster, and the included holdovers allow for rapid use out to 650 yards for targets of known distance.

## **WHAT ARE THE TOP USES FOR THIS PRODUCT?**

3 Gun, tactical shooting, and law enforcement.

## **HOW DOES THIS UNIT COMPARE TO THE MODELS ABOVE AND BELOW IT?**

Versus the Crossfire® 1-4x24 the Strike Eagle® The Strike Eagle® 1-6x24 and 1-8x24 offer an improved optical system with improved color tone, brightness and contrast. The Strike Eagles® are also equipped with the illuminated AR-BDC3 reticle that enables the shooter to range targets out to 650 yards. The Strike Eagle® also comes with a thread-in throw lever.

The Viper® 1-6x24 has an improved field of view, better eye relief by over 1/4 inch, and offers the option of MOA or MRAD turrets and reticles.

## **CAN THE TURRETS BE INDEXED?**

Yes. After zeroing the scope, the turrets can be indexed if desired.

## **WHERE IS THIS UNIT MADE?**

China.
