STRIKE WHILE THE BARREL'S HOT.

When situations demand split-second target acquisition and maximum field of view, mount up the Strikefire® II and get shooting. Compared to its smaller red dot cousins like the SPARC® AR or Crossfire®, the Strikefire® II's larger objective and 30mm tube design provide a larger field of view, and allow it to be mounted at just about any height using most common 30mm rings. From AR-15s to shotguns, the Strikefire® II offers big time versatility at a price that won't break the bank.

STRIKEFIRE® II
